

Yin Auto cutting machine HY-HC32 Series

Automatic equipment specialized in mass cutting

Technical Parameters

Technical specifications	HY-HC3205/07LS
Effective cutting area (W*L) mm	3200 X 3150
Maximum cutting height(after vacuum adsorption)	5/7cm
Maximum mechanical speed	60m/min
Power supply	AC220V/60Hz (50Hz)/30kw
Air source (dry and clean compressed air)	0.55Mpa (79.8psi) 160L/min
Connection mode of CAD and CAM	Network connection/U disk/bar code reading
Fabric cutting mode	vertical reciprocating type
Sharpening system	Automatic sharpening/double wheel rotator type
Total weight	3400kg

※ All machines are custom-made. Width, length, and head configuration are tailored to customer's requirements.

Applications

HY-HC32 series are specially designed for wide fabric with low melting point, such as medical gown.

Other applications also apply.

Sportswear

Knitting

Medical gown

Features

- Reduce maintenance time and extend life by dust collection equipment.
- Low noise, long life by synchronous belt drive rather than chain.
- L shape clothing, optimized structure on transmission shaft of C axle for steady working.
- New energy saving pump with lower noise, capacity and power.
- Intelligent Software functions: Automatic cloth correction; Automatic troubleshooting; Automatic setting change notifications; adjustable material melting level setting.
