

HY-S1624

Specialized in sample making

Feature

- It adopts whole absorption mode to ensure cutting precision.
- It uses double wheel rotatory knife grinder with uniform sharpening.
- Sharpening time interval can be freely adjusted and set.
- It has high cost performance and small and light appearance, and saves space.
- It is suitable for cutting various materials which are hard to cut manually.
- It has three emergency stop buttons, improving operating security.

Technical parameter

Parameter	HY-S1624
Available cutting area(LxW)	2400x1600(mm)
The maximum cutting height	5mm
The maximum mechanical speed	60m/min
Power supply	3 Phase AC380V/50Hz/10KW
Compressed air source	0.55MPa、60L/min
Weight	750kg

*Machines can customize according to the actual needs of customers, but weight and outer contour size changes.
